

# Vision and Mission

## *School of Biological Sciences*

### **Preamble:**

“School of Biological Sciences”, the sixth school under Ramakrishna Mission Vivekananda Educational and Research Institute (RKMVERI), Deemed-to-be-University, has been conceptualised to add another dimension to existing ones, to fulfil Swami Vivekananda’s vision of building a great university. There has been a growing academic interest in interdisciplinary courses covering the vast areas of Biological Sciences, namely Biotechnology, Genetic Engineering, Immunology and Medical Sciences. These disciplines are at the forefront of scientific research activities and technologies that are needed for the universal well-being in the world.

### **Vision:**

To strive to become a Centre of excellence in education and research in the field of Biological Sciences, blending theoretical and practical knowledge in this field and imparting such knowledge as well as technological skills to the students aspiring to explore, learn about and research into the fascinating world of Life Sciences both extensively and intensively.

### **Mission:**

- ❑ To provide effective interdisciplinary learning ambience through interfacing different medical and agricultural departments with basic science disciplines in order to create synergy among them.
- ❑ To offer unique academic programmes at the post graduate level and stimulate research in the above interdisciplinary areas.
- ❑ To undertake research activities of high standard in various areas of Biological Sciences that would make an impact at the national and international levels.
- ❑ To devise and offer short term training programmes for facilitating human resource development in various areas of Biological Sciences, such as Medical Biotechnology, Medical laboratory technology, etc.
- ❑ To strive to develop state-of-the-art infrastructural facilities that would meet global standards.
